

Lagunas

Lagunas is the new eroded font that was created with Fonty on my phone and edited with FontForge on my computer. Thus, it is a second installment of Doujin Fonts series and an another grunged-up font.

Comparison of state of the art

Aclonica (2011)

There was a rich man in Indonesia.

There was a rich man in Indonesia.

Lagunas (2018)

A font with the same aims as this one exists on FontSpace, "Aclonica". This is a font where the grunged-up letters are based on the font by AOETI called "Aclonica".

Creation Notes

This font is based on “Aclonica” and has a grungy feel. The glyphs are modified as well, using FontForge.

All of that said, I hope that you enjoy using this font as much as I enjoyed making it. :)

Please enjoy this font. :)
